

Potts Camp

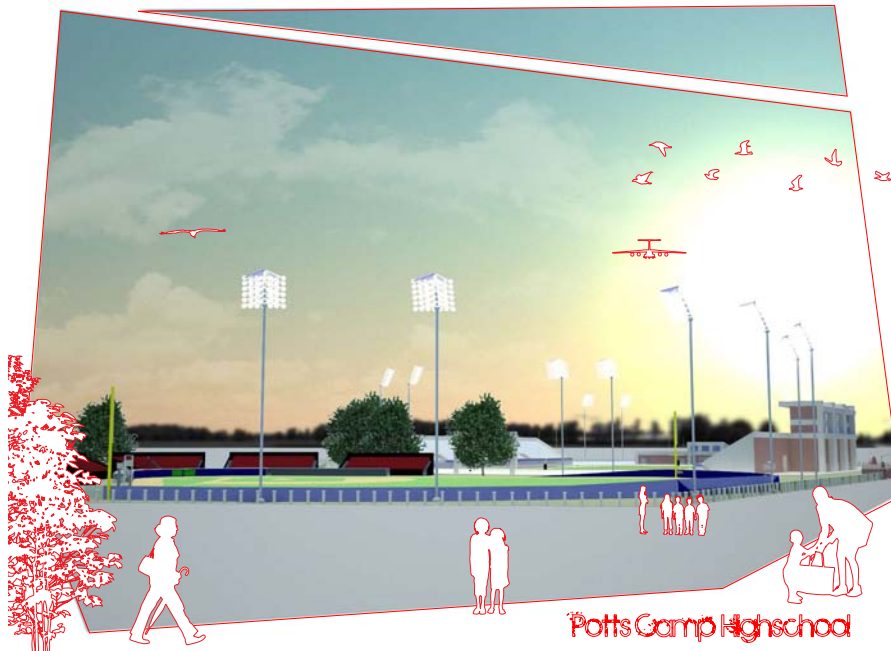

Athletic Facilities

Standard
2010

The Potts Camp school worked with a civil engineer and the local board of supervisors to grade a site adjacent to the high school for new athletic facilities. EDI worked with the school, looking at layout options and providing presentation drawings of the school's choice of designs.

EDI provides a variety of services for school districts, including facility analysis, master planning, preliminary design, and visualization studies. Our goal is to provide the appropriate level of service for each district, meeting the district's needs while improving educational opportunities for Mississippi's children.
