

STARKVILLE GYM PROPOSAL

EDI was approached by the Starkville School District to provide a comprehensive analysis of the district's athletic facilities. The existing high school gymnasium is too small (1,600 seats), and because it is located on the second floor of the school, egress is a major concern.

Concluding that renovating and expanding the existing gymnasium was not feasible, EDI worked with the school district to develop a new "coliseum" style gymnasium. With seating surrounding the court, the capacity of the new gym is 2,500 for basketball. Moreover, access and egress are dramatically improved.
